DESCRIPTORS	Elementary Secondary Education; Instructional Staff; *National Surveys; *School Personnel; *School Statistics; School Surveys; *School Systems; *Student Enrollment; Student Teacher Ratio; Tables (Data)

ABSTRACT

This publication is the fifth annual statistical report on pupils and staff members of local school systems throughout the United States. The data presented here were current as of fall 1971, and were collected from a representative sample of 2,551 local public school systems from all 50 states and the District of Columbia. Most of the information was drawn from records of the various state education agencies. Numerous data tables present statistics on such parameters as number of pupils enrolled at each instructional level, number of instructional and noninstructional staff members employed, and pupil-teacher ratios. One group of tables presents summary data for the entire United States and for each of four regions. Within each table, data are further broken into categories according to level of total pupil enrollment and metropolitan status. A second group of tables presents data individually for each local school system, with systems grouped by state and by total pupil enrollment. (JG)

NATIONAL CENTER FOR EDUCATION STATISTICS

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall . . . collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States; conduct and publish reports on specialized analyses of the meaning and significance of such statistics; . . . and review and report on education activities in foreign countries."--Section 406(b) of the General Education Provisions Act, as amended (20 U.S.C. 1221e-1).

FOREWORD

This publication, containing data on pupils and staff in the Nation's local public school systems as of fall 1971, is the fifth annual report in the Elementary-Secondary General Information System (ELSEGIS) series. This survey was a cooperative effort of the National Center for Education Statistics (NCES) and the Committee on Evaluation and Information Systems (CEIS) of the Council of Chief State School Officers.

The ELSEGIS series fills a need for reliable data on individual local public school systems. The data have been used by educational administrators at all levels of government–Federal, State, and local–as well as by organizations in the private sector.

This publication presents basic data and summary tables, and a brief discussion of the data contained therein. The information has been derived from a sample survey designed so that regional, metropolitan status, and national estimates could be generated.

All phases of the survey have been conducted in the Elementary-Secondary Surveys Branch under the direction of Warren A. Hughes, assisted by Janet L. Hall. The Division of Automated Data Processing provided computer support under the supervision of Thaddeus Chmura.

We express our sincere appreciation to the CEIS representatives, other State agency research and statistical personnel, local school officials, and all persons who participated in the effort.

INTRODUCTION

This publication is the fifth annual report on personnel of local education agencies (LEA's) derived from the Elementary-Secondary General Information System (ELSEGIS) series. Information presented here is as of fall 1971.

The ELSEGIS series also includes data on finances for selected local public school systems. An analysis of the finance data will be published separately.

The universe of inquiry for this survey was the approximately 16,735 operating local public school systems in the 50 States and the District of Columbia. From this universe a sample of 2,551 systems was selected. As in the previous ELSEGIS series the survey was designed to collect as much of the required data as possible from the records of State education agencies (SEA's). As a result of this continued effort a response rate of approximately 100 percent was attained.

The survey items were designed to agree, as nearly as possible, with previously established definitions and terminology of the U.S. Office of Education handbooks.[1] The standard terminology and definitions contained in these handbooks have been developed jointly by the U.S. Office of Education, the State education agencies, educational organizations, and prominent educators—including local school officials.

Every effort possible has been made to present data that are comparable from system to system as well as from State to State. Wherever discrepancies had been detected, they were corrected or footnoted.

Most tabular presentation analyses in this publication are based on the following controls:

a. Six enrollment-size groups, based on the average daily membership (ADM) of the school systems as determined by presample selection and design:[2]

   25,000 or more
   10,000 - 24,999
   5,000 - 9,999
   2,500 - 4,999
   300 - 2,499
   Under 300

   These categories are identical to those used in previous ELSEGIS publications and provide a stable basis for comparison over the ELSEGIS report series.

b. Three metropolitan status categories:

   Metropolitan, central
   Metropolitan, other
   Nonmetropolitan

   A school system was regarded as "metropolitan" if it was located in a county defined as a standard metropolitan statistical area (SMSA). In New England, SMSA's were determined on the basis of towns, rather than counties. A school system located outside of the SMSA's was classified as "nonmetropolitan."

---

[1] Handbook I – *The Common Core of State Educational Information.*
Handbook II, Revised – *Classifications and Standard Terminology for Local and State School Systems.*
Handbook IV – *Staff Accounting for Local and State School Systems.*
Handbook V – *Pupil Accounting for Local and State School Systems.*

[2] See Appendix A, *Sample Design and Selection.*

Metropolitan systems were further defined as either "central" or "other" as follows:

If coterminous with or located within the boundaries of a central city (the large city being the hub of the SMSA), the system was classified as "metropolitan, central."

If located within the SMSA but outside of the central city, it was classified as "metropolitan, other."

If, as in some large county-unit school systems, the population of a central city (1960 census) within the system was 50 percent or more of the county population, the system was regarded as metropolitan, central; if less than 50 percent, metropolitan, other. For example, the Mobile, AL, school system was classified metropolitan, central because Mobile made up 54 percent of the county population; but the Dade County, FL, system was placed in the metropolitan, other, category because the central city of Miami accounted for only 31 percent of the county population.

c. Four regions of the United States:

North Atlantic	*Great Lakes and Plains*	*Southeast*	*West and Southwest*	
Connecticut	Illinois	Alabama	Alaska	Utah
Delaware	Indiana	Arkansas	Arizona	Washington
District of Columbia	Iowa	Florida	California	Wyoming
Maine	Kansas	Georgia	Colorado	
Maryland	Michigan	Kentucky	Hawaii	
Massachusetts	Minnesota	Louisiana	Idaho	
New Hampshire	Missouri	Mississippi	Montana	
New Jersey	Nebraska	North Carolina	Nevada	
New York	North Dakota	South Carolina	New Mexico	
Pennsylvania	Ohio	Tennessee	Oklahoma	
Rhode Island	South Dakota	Virginia	Oregon	
Vermont	Wisconsin	West Virginia	Texas	

For consistency in tabulation, the summary data are presented to the nearest whole number. Because the data are estimates derived from a sample, they are subject to both sampling and nonsampling errors. As such, they must not be regarded as precise to the last digit.

Listed below are the two-position State abbreviations adopted by the U.S. Postal Service, and used in the basic data tables:

Abbreviation	*State*	*Abbreviation*	*State*
AL	Alabama	IL	Illinois
AK	Alaska	IN	Indiana
AZ	Arizona	IA	Iowa
AR	Arkansas	KS	Kansas
CA	California	KY	Kentucky
CO	Colorado	LA	Louisiana
CT	Connecticut	ME	Maine
DE	Delaware	MD	Maryland
DC	District of Columbia	MA	Massachusetts
FL	Florida	MI	Michigan
GA	Georgia	MN	Minnesota
HI	Hawaii	MS	Mississippi
ID	Idaho	MO	Missouri

Abbreviation	*State*	*Abbreviation*	*State*
MT	Montana	RI	Rhode Island
NB	Nebraska	SC	South Carolina
NV	Nevada	SD	South Dakota
NH	New Hampshire	TN	Tennessee
NJ	New Jersey	TX	Texas
NM	New Mexico	UT	Utah
NY	New York	VT	Vermont
NC	North Carolina	VA	Virginia
ND	North Dakota	WA	Washington
OH	Ohio	WV	West Virginia
OK	Oklahoma	WI	Wisconsin
OR	Oregon	WY	Wyoming
PA	Pennsylvania		

USER CAUTIONS

The data in this report are comparable from school system to school system, as well as from State to State, to the extent that all data were collected and reported using standard Office of Education handbook terminology.

But, despite the increasing acceptance of the handbook, staff and pupil accounting methods are known to vary widely among the States and, to some degree, among the local school systems.

The State education agencies and the local school systems were encouraged to provide reasonable estimates where precise data were not available. To promote maximum comparability, the survey records were subjected to intensive editing. Where discrepancies were detected, every possible effort was made to secure a revised report. Where apparent discrepancies could not be reconciled they have been identified.

Comparisons among individual school systems may be affected to the extent to which estimates are involved. For this reason, users are cautioned against making direct comparisons without additional investigation.

Of paramount importance, the user should keep in mind, especially when using tables of national estimates, that the data were derived from a sample survey and, therefore, are subject to sampling variability. Please refer to Appendix A, Sample Design and Selection, which includes a section dealing with sample reliability.

ANALYSIS OF DATA

PUPILS

There were 46,023,137 pupils enrolled in the local public school systems of the United States in fall 1971, according to the estimates derived from the fifth Elementary-Secondary General Information System (table A).

For this report, these pupils have been grouped according to five instructional levels - prekindergarten, kindergarten, other elementary, secondary, and special education. Special education is a mutually exclusive category; i.e., pupils are not duplicated under elementary and secondary.

Prekindergarten

Nationally as of fall 1971, 51,027 pupils, or 0.1 percent of the total enrollment, were classified as prekindergarten (tables A and B). In fall 1968, 1.0 percent of all systems offered the prekindergarten program; only 2.0 percent offered it in fall 1971 (table D). In general this program still remains unique to the large urban systems.

Systems with 25,000 pupils or more enrolled 67.5 percent (34,427) of the Nation's prekindergarteners, as compared to 16.8 percent (8,575) in the 10,000 - 24,999 enrollment group, 2.4 percent (1,236) in the 2,500 - 4,999 enrollment group, and no enrollment in the under 300 enrollment group (tables A and C).

Regional variations range from a high of 47.2 percent of all of the Nation's prekindergarten pupils enrolled in the North Atlantic region to a low of 4.6 percent in the Southeast (table C).

Kindergarten

In fall 1971, 64.1 percent of the Nation's local public school systems offered a kindergarten program (table D), an increase over fall 1968 when just about half of the systems offered it. Nationally 2,458,128 pupils were enrolled in kindergarten, accounting for 5.3 percent of the total national enrollment for all levels (tables A and B).

Among systems with enrollments of 25,000 or more pupils, almost 9 out of 10 school systems offered the kindergarten program. At the other end of the scale, among systems with under 300 pupils enrolled, the program was available in only 3 out of 10 systems (table D). The prevalence of kindergarten programs ranged from a high of 74.3 percent in the North Atlantic to a low of 31.2 percent in the Southeast (tables D. 1-3).

In fall 1971, the largest number of kindergarten pupils–906,843 or 36.9 percent of the Nation's total kindergarten enrollment and 6.9 percent of the total regional enrollment were enrolled in the Great Lakes and Plains region (tables A. 2, B. 2, and C). The smallest kindergaten enrollment was in the Southeast where 185,791 pupils were enrolled, representing 7.6 percent of the national kindergarten enrollment and 1.8 percent of the total regional enrollment (tables A.3, B. 3, and C). It should be noted that prekindergarten and kindergarten programs are almost nonexistent in some of the Southeastern States, such as Georgia and Mississippi where relatively few are operated, and North Carolina where the program was inaugurated in 1971 with State funds.

Systems with enrollments of 25,000 or more pupils accounted for 31.0 percent (763,226) of the nationwide total of kindergarten pupils. The other enrollment size groups, except for the under 300 group, showed a fairly even rate of enrollment. Systems with enrollments of 10,000-24,999 accounted for 18.8 percent of the total enrollment; systems with 5,000-9,999 accounted for 16.5 percent; those with enrollments of 2,500-4,999, 15.1 percent; and systems with 300-2,499, 17.5 percent. The under 300 enrollment group included only 0.9 percent of the total kindergarten enrollment (table C).

Other Elementary

This category covers pupils enrolled in grade 1 through the highest grade considered elementary by State and local practice, but not higher than grade 8. The total of 24,249,169 (52.7 percent of the nationwide enrollment) is by far the largest segment of the five instructional levels analyzed in this survey (tables A and B).

Secondary

The total of 18,534,823 pupils classified as secondary accounted for 40.3 percent of the total fall 1971 enrollment (tables A and B). This category contains no pupils enrolled in any grade lower than grade 7 or higher than grade 12. As is true with the "other elementary" level there appeared to be no significant differences among metropolitan status areas or regions.

Special Educaton

Nationally, 50.4 percent of the local public school systems offered special education programs for pupils having physical and mental handicaps (table D). Enrolled in this category were 729,990 pupils or 1.6 percent of the total public school enrollment (tables A and B).

Systems with enrollments of 25,000 or more accounted for 35.7 percent (260,893) of the special education pupils in fall 1971–1.9 percent of the enrollment for this size group which is 29.2 percent of the Nation's total enrollment (tables A, B, and C). In those systems with enrollments of under 300, there were 3,262 such pupils or 0.4 percent of the special education national total and 0.6 percent of the enrollment for this size group which represented 1.2 percent of the total United States enrollment (tables A, B, and C).

The North Atlantic region offered special education programs in 61.3 percent of the local public school systems. The West and Southwest had these programs in only 31.1 percent of the systems (tables D.2 and 5).

The most significant differences regarding special education programs appeared among the metropolitan status categories. Metropolitan, central, areas reported the programs in 86.3 percent of their systems; metropolitan, other, 62.2 percent; and nonmetropolitan, only 44.9 percent (table D).

It should be noted that the lack of a special education program in a school system does not mean necessarily that the handicapped children are deprived of the special services they require. Such children, along with adequate funds, are transferred frequently to neighboring systems which have special education programs.

STAFF

The survey shows that in fall 1971 an estimated total of 3,494,108 persons in full-time equivalents (FTE) were involved in the process of operating the Nation's local public school systems. All staff assignments are reported in terms of FTE (see appendix C, "Specific Instructions" for the definition and method of computing FTE). The aforementioned estimated total includes all school-related assignments from superintendent of schools to maintenance employees (table E).

Based on the total number of staff serving school systems (3,494,108), the average number of pupils per staff member was 13.2. Among enrollment size groups only the under 300 enrollment group showed any significant difference from that of the national average with an average number of pupils per staff member of 10.9 as compared to 13 in the other groups.

Instructional Staff

Staff members who rendered direct and personal services which were in the nature of teaching or the improvement of the teaching-learning situation totaled 2,620,570 in fall 1971 and accounted for 75 percent of the total school system staff (table E). This category includes principals, assistant principals, classroom teachers, other teachers, librarians, guidance staff, psychological staff, audiovisual staff, teacher and library aides, and secretarial and clerical personnel.

Professional instructional staff–As defined here, professional instructional staff members perform assignments regarded as professional in the field of education by the laws and regulations governing certification in the State or other professional educational requirements recognized by the State. Reported in the group were 2,283,281 assignments or 87 percent of the total instructional staff (table E).

Principals–The 71,302 principals reported by the survey for fall 1971 represented a 0.2 percent increase over the fall 1970 estimated total of 71,180 (table F). The ratio of principals to pupils increased as the size of the system enrollment decreased. For example, systems with enrollments of 25,000 pupils or more averaged 12 principals per 10,000 pupils; those with 300 - 2,499 enrollments averaged 19 principals per 10,000 pupils; and in the under 300 enrollment group the average was 36 principals per 10,000 pupils (table L). The large school systems have larger schools; and they have

fewer schools in proportion to the pupil population than do the smaller systems. Therefore, the large school systems have relatively fewer principals.

The ratio of principals to teachers showed the same trend as did principals to pupils. In the 25,000 or more enrollment size group the average was 14 principals per 500 teachers; in the 300 - 2,499 enrollment size group the average was 20 principals per 500 teachers, and in the under 300 enrollment size group the average was 31 principals per 500 teachers.

Assistant principals—Those staff members assigned to assist the heads of schools in the management and direction of the schools numbered 29,868 in fall 1971, an increase of 8.6 percent over the fall 1970 total of 27,511 (table F). It should be noted that in some cases the function of the assistant principal is performed by persons classified as teachers. Because the assistant principal position is not budgeted in some States it is not always reported, such as in the State of Tennessee. Larger systems with larger schools generally have greater need for assistant principals than smaller systems with smaller schools. Thus, there were on the average 9 assistant principals per 10,000 pupils in systems enrolling 25,000 or more pupils, and 4.3 and 1.5 assistant principals per 10,000 pupils in the 300-2,499 and under 300 enrollment groups respectively.

The relationship of assistant principals to principals expressed in terms of assistant principals per 100 principals is as follows:

Enrollment size group	*Assistant principals per 100 principals*
U.S. total	41.9
25,000 or more	71.9
10,000 - 24,999	49.6
5,000 - 9,999	38.4
2,500 - 4,999	29.0
300 - 2,499	22.1
Under 300	4.3

Supervisors of instruction—Nationally 34 percent of all local public school systems had supervisor of instruction positions (table D). Almost all systems with enrollments of 25,000 or more reported one or more supervisors of instruction; but, among systems with less than 2,500 enrollments, only 29 percent reported the position.

Metropolitan, central, systems were more likely to have supervisors of instruction than other systems; 97.5 percent of all metropolitan, central, systems employed supervisors of instruction as compared with 48 percent of metropolitan, other systems and 27 percent of nonmetropolitan systems. This general relationship held true for all regions. In the Southeast 65 percent of all systems had supervisors of instruction and in the North Atlantic, 51 percent; while only 24 percent were reported in the Great Lakes and Plains and 27 percent in the West and Southwest regions (tables D. 3-4).

Classroom teachers—In fall 1971, the survey shows there were 2,035,226 classroom teachers in the Nation's local public school systems, an increase of 1.1 percent over the fall 1970 total of 2,013,506 (tables E and F). For this report classroom teachers, like pupils, have been classified into five mutually exclusive categories by instructional level - prekindergarten, kindergarten, other elementary, secondary, and special education. Respondents were asked to report on teachers according to the same classifications used for pupils.

The classroom teachers accounted for 89 percent of the total professional instructional staff, and 58.2 percent of the total school system staff. In systems with pupil enrollments of 25,000 or more, there were 564,881 classroom teachers. They accounted for 27.8 percent of the total classroom teachers in the Nation.

Because of differences in reporting, the total number of elementary teachers and the total number of secondary teachers will not be compared with prior years' data in this series. Previously, special education teachers were grouped with elementary and secondary teachers rather than reported separately.

Prekindergarten teachers—The survey's total of 2,063 prekindergarten teachers in fall 1971 represented 0.1 percent of the total classroom teachers and 0.2 percent of the elementary teacher total. The number of teachers in early childhood programs has fluctuated considerably over the past several years, showing an increase of 27.2 percent from

fall 1969 to fall 1970, but a decline of 34 percent from fall 1970 to fall 1971 (table F). This decrease is probably related to the Nation's falling birth rate and the reassignment of former prekindergarten teachers to other areas.

In general, the larger the system, the more likely it would have a prekindergarten program. Systems with enrollments of 25,000 or more reported 1,356 prekindergarten teachers or 65.7 percent of the national total; on the other hand, systems with 2,500 - 4,999 pupils reported only 41 prekindergarten teachers or 2 percent of the national total.

Kindergarten teachers–The total of 63,159 kindergarten teachers in fall 1971 represented an increase of 9.4 percent over the fall 1970 total of 62,572 (table F).

The percent distribution of kindergarten teachers by enrollment size group closely paralleled that distribution for kindergarten pupils, as follows:

Enrollment size group	*Percent distribution*	
	Kindergarten teachers	*Kindergarten enrollments*
U.S. total	[1]100.0	[1]100.0
25,000 or more	30.2	31.0
10,000 - 24,999	18.6	18.8
5,000 - 9,999	15.7	16.5
2,500 - 4,999	15.2	15.1
300 - 2,499	18.2	17.5
Under 300	2.1	.9

Other elementary teachers–The fall 1971 total of 1,017,519 other elementary teachers (table E) was 50 percent of the total classroom teachers, 94 percent of all elementary teachers reported and 44.6 percent of the total professional instructional staff.

Secondary teachers–The survey's total of 874,103 secondary teachers in fall 1971 represented 43 percent of the total classroom teachers and 38 percent of the total professional instructional staff.

The percentage distribution of other teachers by enrollment size group was about the same as elementary and secondary teachers:

Enrollment size group	*Percent distribution*	
	Other elementary teachers	*Secondary teachers*
U.S. total	[1]100.0	[1]100.0
25,000 or more	27.0	27.8
10,000 - 24,999	17.7	18.8
5,000 - 9,999	17.5	17.4
2,500 - 4,999	16.3	15.2
300 - 2,499	19.5	19.6
Under 300	2.0	1.1

Special education teachers–Teachers in special education programs have been reported separately for the first time in the fall 1971 ELSEGIS series. The total of 78,381 represented 3.9 percent of the total classroom teachers (table E).

Librarians–There were 43,912 librarians reported in fall 1971, an increase of 3.2 percent over the 42,540 reported in the fall of 1970. Librarians accounted for 2 percent of the total professional instructional staff (tables E and F).

Nationwide 64 percent of all school systems had one or more school librarian(s) in fall 1971. This percentage varied considerably among enrollment size groups. Almost 100 percent of the 25,000 or more enrollment school systems reported this position, compared with only 14 percent for the under 300 enrollment group (table D).

---

[1] Detail may not add to total, because of rounding.

Guidance staff—The estimated number of persons responsible for advising pupils with regard to their abilities and aptitudes, educational and occupational opportunities, personal and social adjustments, etc., was 51,851 in fall 1971 (table E). Nationally, 55 percent of all school systems reported guidance staff (table D). In the 25,000 or more enrollment systems, almost all (98.9 percent) reported this position. In the under 300 enrollment group, only 8 percent of the systems employed guidance staff.

Regional comparisons reveal that the Southeast had the highest proportion of guidance staff with 86 percent of all systems reporting this position; the West and Southwest reported the lowest proportion, 33 percent (tables D. 3-4).

In fall 1967, 43,721 guidance staff were reported. Fall 1971's total of 51,851 is an increase of 18.6 percent. Comparisons of guidance staff per 10,000 pupils follow:

Guidance staff per 10,000 pupils

Enrollment size	*Fall 1967*[1]	*Fall 1971*	*Increase*
U.S. total	9.8	11.3	1.5
25,000 or more	10.2	11.8	1.6
10,000 - 24,999	10.6	12.0	1.4
5,000 - 9,999	10.2	11.6	1.4
2,500 - 4,999	9.5	10.9	1.4
300 - 2,499	9.0	10.0	1.0
Under 300	4.0	4.2	.2

[1] U.S. Department of Health, Education, and Welfare, Office of Education, *Statistics of Local Public School Systems, 1967: Pupils/Schools/Staff*

Psychological staff—Psychologists and psychometrists responsible for providing psychological services to pupils including the administration and interpretation of psychological tests were reported as being in 17 percent of all local public school systems in fall 1971 (table D). The estimated number of 6,907 is a decrease of 3.2 percent from fall 1970 when 7,136 psychological staff were reported (table F). Comparison by enrollment size of school system shows that 88 percent of all systems with 25,000 or more enrollments reported having psychological staff, and only 1 percent so reported in the under 300 enrollment size group (table D).

The distribution of psychological staff among the enrollment size group follows (table E):

Enrollment size group	*Number reported*	*Percent*
U.S. total	6,907	100.0
25,000 or more	2,283	33.0
10,000 - 24,999	1,573	22.8
5,000 - 9,999	1,400	20.3
2,500 - 4,999	966	14.0
300 - 2,499	644	9.3
Under 300	41	.6

Psychological staff, as is the case with other specialized staff members, are more apt to be employed in school systems with large student enrollments. In terms of psychological staff per 10,000 pupils, systems with 25,000 or more pupils employed about 2 psychological staff members per 10,000 pupils, while among systems with 2,499 and fewer pupils, the ratio was about 1 (0.8) staff member per 10,000 pupils (table L).

Audiovisual staff—Persons classified in audiovisual staff positions totaled 2,154 in fall 1971 (table E), a decrease of 20.4 percent from fall 1970 when 2,705 were reported (table F). This decrease is probably due to reporting rather than to an actual decrease in the audiovisual function. *Classifications and Standard Terminology for Local and State School*

Systems 1974, Handbook II, Revised, recommends that the positions of librarians and audiovisual personnel be combined and reported under the activity assignment of "Librarians/Media Specialists." Those States which have adopted this handbook are probably reporting audiovisual personnel accordingly.

Nonprofessional instructional staff–Personnel included in this group perform assignments not regarded as professional and for which no set standard of education is required. In fall 1971, there was a total of 337,289 such staff assignments, 13 percent of the Nation's total instructional staff (table E). Included in this category are teacher and library aides, secretarial, clerical and other personnel.

Teacher aides–The number of aides who assisted classroom teachers in fall 1971 was 131,482 (table E). It has been increasing each year since fall 1967 when this survey series began. The 4-year increase over the 57,684 teacher aides in fall 1967 was 128 percent; the 1-year increase over the teacher aides reported in fall 1970 was 12.1 percent. The funding of this position under title I of the Elementary and Secondary Education Act probably contributed importantly to this increase. In fall 1971, 87 percent of all personnel classified as aides were teacher aides; they were reported as employed in 53 percent of all school systems in the Nation.

The average number of teacher aides per 10,000 pupils was 28.6 nationally. Metropolitan, central systems averaged about 36 teacher aides per 10,000 pupils; metropolitan, other systems, 21 per 10,000 pupils; and nonmetropolitan systems, 32 (table L).

On the average a teacher aide serves 15.5 teachers; however, this proportion increases as the enrollment size of system decreases, note the following:

Enrollment size of system	*Ratio of teachers to teacher aides*
U.S. total	15.5
25,000 or more	12.4
10,000 - 24,999	15.1
5,000 - 9,999	17.2
2,500 - 4,999	16.5
300 - 2,499	19.4
Under 300	23.3

Library aides–Persons working in school libraries and performing activities not classified as professional numbered 17,185 in fall 1971 (table E). The estimated total was an increase of 4 percent over fall 1970 when 16,487 were reported. Library aides accounted for 11 percent of all aides reported. Nationally there was one library aide for every 2.6 librarians with little difference among enrollment size groups, note the following:

Enrollment size of system	*Ratio of librarians to library aides*
U.S. total	2.6
25,000 or more	2.9
10,000 - 24,999	2.3
5,000 - 9,999	2.2
2,500 - 4,999	2.5
300 - 2,499	2.8
Under 300	2.4

Secretarial, clerical, and other personnel–A total of 188,623 staff (table E) are assigned to this category performing activities that assist the professional instructional staff. These employees account for 55.9 percent of the total nonprofessional instructional staff. Ratios of these employees to total professional staff by enrollment size of system are as follows:

Enrollment size of system	*Ratio of professional instructional staff to secretarial, clerical, and other personnel*
U.S. total	12.1
25,000 or more	10.5
10,000 - 24,999	11.2
5,000 - 9,999	12.2
2,500 - 4,999	14.0
300 - 2,499	14.6
Under 300	14.8

Noninstructional Staff

These staff members are engaged in activities which, although in the service of the school system, relate more closely to a particular field of professional or technical specialization other than education. This group of employees totaled 873,538, or 25 percent of the total school system staff (table E).

Professional noninstructional staff–Included in this total of 83,817 (table E), which is 9.6 percent of the total noninstructional staff, are 30,475 staff members classified as administrative (36.4 percent of the total professional noninstructional staff); 23,251 in the area of physical and mental health duties (27.7 percent); 11,445 visiting teachers, social workers, and "other" personnel (22.2 percent).

Nonprofessional noninstructional staff–The estimated 789,721 employees in this category represent 22.6 percent of the total school system staff. Included in this group are 2,596 health aides, persons classified as nurses aides, first aid assistants, etc. The remaining 787,125 are employed in positions such as maintenance workers, janitors, cafeteria workers, bus drivers, etc. (table E).

PUPIL-TEACHER RATIOS

Nationally over all levels of instruction, the pupil-teacher ratio (PTR) as estimated by the survey was 22.6 in fall 1971. In general, the average PTR decreases as the enrollment size of the school system decreases. Thus, the ratio in the 25,000 and more enrollment size group was 23.7, compared with 17.5 for the under 300 enrollment size group (table M).

PTR's for prekindergarten and kindergarten levels are shown in the "M" tables. However, these statistics cannot be regarded as realistic indicators of average class size. Prekindergarten and kindergarten classes are frequently half-day programs for children, but full-time assignments for the classroom teachers, each of whom carries a morning and afternoon session. With pupils reported in unit counts and teachers in full-time equivalency (FTE), the quotient of dividing the former by the latter represents a PTR of about twice the actual class size.

Elementary PTR's are higher than secondary PTR's for virtually all of the survey cells (tables M.2-M.4). The national average PTR for the elementary level was 23.8 compared with 21.2 for the secondary level. The PTR's for the 25,000 or more enrollment size group were 24.9 for the elementary and 22.7 for the secondary level, while in the under 300 enrollment size group the corresponding PTR's were 19.3 and 14.2.

Although there were some PTR variations in individual cells, regional differences were fairly consistent. From low to high they rank as follows: North Atlantic (22.0 elementary and 19.1 secondary), Great Lakes and Plains (23.3 elementary and 21.2 secondary), West and Southwest (24.0 elementary and 22.7 secondary), and Southeast (26.1 elementary and 22.1 secondary).

The national average PTR for special education classes was 9.3 in fall 1971. Across regions and metropolitan status areas no significant differences occurred, with the ratios clustered very close to the national average. The average of 9.3 for special education classes was considerably smaller than that for regular programs.

BASIC TABLES

Table 1.–*Numbers of pupils and ratios of pupils to teachers, by organizational level and enrollment size of school system, for selected local public school systems: United States, fall 1971*

NOTES: Enrollment and staff data reported in this table are the numbers on the school system's books on or about October 1, 1971, when the school system's operation was considered to be stable.

Pupil-teacher ratios (PTR's) have been calculated by dividing the pupil counts for each category by the teacher counts for the corresponding category. The primary category is the sum of prekindergarten and kindergarten. Elementary and secondary categories conform with definitions of State and local agencies. However, no grade lower than grade 1 or higher than grade 8 is included in elementary, while no grade lower than grade 7 or higher than grade 12 is included in secondary. It was also requested that pupils and teachers be reported on the same organizational level.

Some of the PTR's for the primary grouping appear quite large. This occurs usually in circumstances where pupils are on half-day sessions. When 30 pupils attend a morning session and another 30 attend an afternoon session taught by the same teacher, the number of pupils reported is 60, the number of teachers is 1, and the resulting PTR is 60.

Special education is a combination of elementary and secondary pupils and teachers. For a complete definition of this category, refer to appendix C, Instructions, for lines 4e and 30.

Column (2) MSC, refers to a code identifying the systems by metropolitan status as follows: 1. Metropolitan, central; 2. Metropolitan, other; and 3. Nonmetropolitan.

Table 2.–*Summary of staff employed, by type of assignment and enrollment size of school system, for selected local public school systems: United States, fall 1971*

NOTES: The positions counted in this table are all of the staff, professional and nonprofessional, involved in all functions of operating schools and school systems. Entries are reported in terms of full-time equivalents and are reported to the nearest tenth. For a complete definition of full-time equivalents (FTE), refer to appendix C, Instructions, sec. 1.

* ESTIMATED ENTRY.

Table 3.–*Instructional staff employed, by type of assignment and enrollment size of school system, for selected local public school systems: United States, fall 1971*

NOTES: Included in this table are those staff members who render direct and personal services which are in the nature of teaching or the improvement of the teaching-learning situation.

All entries are reported in full-time equivalents (FTE's) and are to the nearest tenth.

C. Survey Form and Instructions

APPENDIX A

Sample Design and Selection

The population of inquiry was based on the approximately 16,735 operating local public school systems with grade spans and enrollment data that were listed in *Education Directory, Public School Systems, 1971-72.* However, two types of adjustments were made to this universe. Certain special districts which were included in the Directory were considered out of scope of the survey. Also, adjustments were made to the universe to cover the fact that some sample school systems reported as "operating" in the Directory were either nonoperating or consolidated with other systems. After adjustments, the net universe for purposes of this survey consisted of 16,531 school systems.

The design of the sample was that of a single stratified systematic random sample. The systems were stratified by region (4), metropolitan status code (3), and by enrollment size (6). These categories are defined in the introduction. All systems with enrollment of 10,000 or more were selected with certainty. The sample size for enrollment strata 300 - 2,499, 2,500 - 4,999, and 5,000 - 9,999 was based on the requirement that the estimate for the major characteristics of interest would have a relative error of 7.5 percent or less at the 2 sigma level while for the under 300 stratum the precision requirement was set at 10 percent. When the size of the sample computed under these conditions was less than 50, the sample size was raised to either 50 or the total number of systems in the cell. This procedure produced a total sample of 2,551 systems. However, six systems were no longer in operation and four were nonrespondents. Thus, the net sample was 2,541 systems.

It was anticipated that enrollment would be highly correlated with many other survey variables. Accordingly, 1970-71 ADM or, where not available, ADA or other count measures were used as the design variable.

In the basic data tables, school systems are listed by enrollment-size stratum on the basis of the enrollment figures submitted on the report form rather than that shown in the Education Directory. In the summary tables, data are grouped on the basis of the enrollment reported in the survey, but inflated on the basis of original sample selection; i.e., the enrollment figure reported in the Education Directory. Sampling information including the universe, sample, inflation factor, and the number of systems listed and grouped in each cell is given in table i.

Sampling Reliability

Estimated totals for each survey cell were arrived at by inflating the figures for each survey cell by the reciprocal of the inflation factor adjusted for nonresponse. Because the figures in this report are estimates derived from a sample, they are subject to sampling error. Approximations to the sampling variance were computed by means of the successive difference method. For convenience of interpretation the variances were converted to relative sampling error or coefficients of variations for most of the survey items for the U.S. total and for the marginal totals—enrollment size, metropolitan status, and region; table iii gives coefficients of variation for pupil-teacher ratios for selected variables. The chances are about 2 out of 3 that the percentage difference between an estimate and the figure that would have been obtained from a complete canvass of all school systems using the same survey forms and procedures would be less than the limit of error specified in the table. Similarly, the chances are about 19 out of 20 that the percentage difference would be less than twice the specified limit of error, and about 99 out of 100 that it could be less than 2.5 times the specified limit. An illustration of the use of the sampling variability tables follows:

> The national estimate of the number of prekindergarten teachers in local public school systems is 2,063 (table E). The relative sampling error given in table ii is 4.4 percent or 91 teachers. In applying the probabilities described above, the chances are about 2 out of 3 that the figure of 2,063 would not differ by more than 91 from the results of complete coverage of all school systems in the universe.

The coefficient of variation does not reflect response biases or systematic errors that may have been incurred in the data handling process such as would be applicable even if there were complete coverage of all school systems. However, concerted effort was made to minimize such errors through editing and followup procedures.

Table i.--Universe and sample, by region, metropolitan status, and enrollment size of school system

Region	Metropolitan Status Code	U.S. total			Enrollment size of school system																							
					25,000 and over				10,000 - 24,999				5,000 - 9,999				2,500 - 4,999				300 - 2,499				Under 300

[1] The coefficients of variation are estimates.
[2] Data for 25,000 and over and 10,000 - 24,999 enrollment stratum, and the metropolitan central group are not shown because they are without sampling error (the universe for these groups were used in the survey).
[3] Prekindergarten and kindergarten are added together.

APPENDIX B

Related Data

In addition to this survey showing data collected on individual school systems and providing national estimates as well, the National Center for Education Statistics (NCES) conducts other surveys from which data for national and State totals of schools, pupils, finance, and staff are collected.

The survey *State Elementary and Secondary School Statistics* consists of comprehensive State aggregate reports collected biennially. It reports data on public school organization, staff, pupils, and finances. Data are currently in preparation for release in the publication *Statistics of State School Systems, 1969-70.*

The survey *Fall Report on Membership, Teachers, and School-housing,* popularly known as the "fall survey," is conducted each fall to obtain quick estimates of enrollment, number of teachers, school-housing statistics, and estimated expenditures for the current year. As with the biennial survey, data are collected by means of State aggregate reports. Data covering the same time period as the present survey are presented in *Fall 1971 Statistics of Public Schools.*

Education Directory: Public School Systems, is prepared annually. Because data on the number of pupils (usually average daily membership (ADM) for the previous years) are collected, summary data are tabulated. The directory with data corresponding most closely to those of this report is *Education Directory, 1972-73: Public School Systems.*

Because of differences in purposes, coverage, and method of data collection, estimates in this publication will vary slightly from figures for the same or similar variables presented in some other NCES publications. For example, the national estimate of fall 1971 classroom teachers in this report is 2,035,226; the comparable figure for the fall 1971 survey is 2,063,000.

INTRODUCTION

With this report form, the U.S. Office of Education in cooperation with the Committee on Educational Data Systems *(CEDS)* of the Council of Chief State School Officers continues the Elementary-Secondary General Information System *(ELSEGIS)*.

Data are being requested from a sample of local public school systems. To those who participated in past ELSEGIS surveys, we thank you for your continued excellent response; to those participating for the first time, your cooperation in this important project is very much appreciated.

In completing the form, please follow the instructions very carefully.

29. SECONDARY *(not lower than grade 7 nor higher than grade 12)*		
30. SPECIAL EDUCATION		
31. TOTAL PUPIL MEMBERSHIP *(sum of lines 26 thru 30)*		

INSTRUCTIONS

GENERAL INSTRUCTIONS

Data should be reported as of October 1, 1971, or some other early fall 1971 date when the school system's operation can be considered stabilized.

Enter data into the proper field. If the value of a field is zero, leave the field blank. If precise data are not available, please provide your best estimate of the entry for that variable, and enter "1" in the column provided.

SPECIFIC INSTRUCTIONS

Section 1. This section is designed to obtain data for the entire staff of the school system and should, therefore, include staff members assigned to individual schools as well as those working out of the central office. Count only full- and part-time staff members filling positions. DO NOT count unfilled positions.

> Full-time equivalency of assignment is the amount of employed time that is normally required of a staff member to perform a less-than-full-time assignment within an assignment classification in proportion to that normally required in a full-time assignment in the same assignment classification, with "1.0" representing one full-time assignment. It is derived by dividing the amount of employed time normally required in the less-than-full-time assignment by the amount of employed time normally required in a corresponding full-time assignment. Full-time equivalency of assignment should be expressed as a decimal fraction to the nearest tenth.

For each position assignment category determine the full-time equivalency of each staff member. The sum of the equivalencies of each staff member within an assignment category should be entered in the appropriate space on the form.

Examples:
1. Each person assigned full-time to a position category should be counted as 1.0.
2. A person employed full-time, but assigned to more than one position category should be counted part-time in each category, e.g. a person who spends 3 days per week as a guidance counselor and 2 days as a classroom teacher should be counted 0.6 as counseling, and 0.4 as teaching.
3. A teacher aide employed 2 hours per day in a school system with a 6-hour day should be counted as 0.3.

DEFINITION OF POSITION ASSIGNMENT CATEGORIES

LINE 1. Staff members assigned as administrative heads of schools, i.e., those to whom the major responsibility for the management and direction of the activities of the school has been delegated.

LINE 2. Staff members assigned to assist the head of a school in the management and direction of the school.

LINE 3. Staff members performing activities of leadership, guidance, and expertness in a field of specialization for the purpose of improving the performance of teachers and other instructional staff members.

LINES 4c, 4d. The classification of teachers into elementary and secondary will depend on State and local practice. However, teachers of grades higher than 8 should not be reported as elementary and teachers of grades lower than 7 should not be reported as secondary. Where a teacher is teaching at both the elementary and secondary levels, prorate the assignment between the levels in terms of full-time equivalents.
NOTE: Teachers should be reported on the same organizational level as pupils are reported in Section II. For example, if a seventh grade teacher teaches pupils who are reported as "secondary" the FTE of this teacher should be reported as secondary.

LINE 4e. Elementary and secondary teachers assigned to programs specifically designed to meet the needs of handicapped children *(where handicapped refers only to educable mentally retarded, trainable mentally retarded, hard-of-hearing, deaf, speech impaired, visually impaired, or seriously emotionally disturbed, learning disabled, crippled or other health-related handicaps)*. Teachers reported here are not to be included in items 4a thru 4d above. Also, speech therapists who provide direct services outside the child's regular classroom should be reported in Item 17.

LINE 5. Staff members who teach through the mediums of television or radio, and teachers of the homebound who are on the school system staff.

LINE 6. Staff members responsible for organizing and managing school libraries.

LINE 7. Staff members responsible for advising pupils with regard to their abilities and aptitudes, educational and occupational opportunities, personal and social adjustments, etc.

LINE 8. All psychologists and psychometrists responsible for providing psychological services to pupils, including the administration and interpretation of psychological tests. DO NOT include here psychiatrists or psychiatric social workers. Such noninstructional professional staff should be reported in item 17.

LINE 9. Staff members responsible for preparing, caring for, and making available to instructional programs, the equipment, materials, scripts, and other aids which assist teaching and learning through special appeal to the senses of sight and hearing, e.g., director of audiovisual services, film inspector, projectionist, scriptwriter, graphic artist, etc.

LINE 10. Sum of lines 1 through 3, 4f, and 5 through 9.

LINE 11. Staff members performing activities of a nonteaching nature which are NOT classified as professional educational, but which assist a teacher to perform professional educational teaching assignments *(aides, helpers, assistants, etc.)*.

LINE 12. Staff members working in the school library who perform activities which are NOT classified as professional. Such duties may include distributive functions for the loan of materials, and assistance with the organization and use of materials.

LINE 13. Secretaries and clerks assisting the professional staff reported in 1-9 above.

LINE 14. Sum of Lines 11 through 13.

LINE 16. Superintendent of schools, deputy, associate, and assistant superintendents of schools, school business officials, and other professional administrative staff employed either full-time or part-time by the school system. *(DO NOT include principals and assistant principals included in lines 1 and 2 above).*

LINE 17. Include staff members employed either full-time or part-time by the school system, such as physicians, psychiatrists, school nurses, dentists, dental hygienists, and therapists *(speech therapists, physical therapists, and psychologists whose primary assignment is psychotherapy)* who provide services in the fields of physical health, mental health, and special education.

LINE 18. School social workers, community workers, visiting teachers, and attendance officers employed full-time or part-time by the school system. *(Psychiatric social workers are considered health personnel and should be reported on line 17.)*

LINE 19. Attorneys, architects, engineers, and other professional non-instructional personnel employed by the school system not included above.

LINE 20. Sum of lines 16 through 19.

LINE 21. Staff members assisting professional school health personnel who are not classified as professional, such as nurses aides, first aid assistants, etc.

LINE 22. Such nonprofessional staff as janitors, maintenance men, cafeteria workers, bus drivers, and secretarial and clerical workers other than those reported in line 13.

LINE 23. Sum of Lines 21 and 22.

LINE 24. Sum of Lines 20 and 23.

LINE 25. Sum of Lines 15 and 24.

Section II. This section is designed to obtain data on the number of pupils in membership by level as carried on the official membership roll of the school system as of October 1, 1971 or the nearest date thereto when membership can be considered stabilized.

LINE 28. Report as elementary according to State and local practice, however, pupils so reported should be assigned to no grade lower than grade 1, nor higher than grade 8.

LINE 29. Report as secondary according to state and local practice, however, pupils so reported should be assigned to no grade lower than grade 7, nor higher than grade 12.

NOTE. Pupils should be reported on the same level of organization as their teachers. See note following items 4c, 4d.

LINE 30. SPECIAL EDUCATION. If the system offers a program designed to meet the needs of handicapped children *(as defined for line 4e above)* students served by such a program should be reported here. Students classified and reported as special education students, MUST NOT be reported in the level where they might normally be assigned.

LINE 31. Sum of Lines 26 through 30.
